Research

INTERVIEW FINDINGS

They value their personal hiking experience.

Stamina and distance determine whether they enjoy a hike.

They want detailed information on what to bring.

They respond positively to varied hiking experiences like trekking.

Many hold a negative view of socializing-focused hiking clubs.

MARKET • COMPETITOR ANALYSIS

Interest in hiking has grown since COVID, and 20s–30s beginners are joining one-off hiking crews through social media.

Hiking crews have a key limitation: members can't see information about who they're hiking with, and there's little flexibility.

Hobby apps tend to expand into more categories over time — to differentiate, we set our STP to focus solely on the individual hiking experience.

Core Value

CORE VALUE

A Hiking Mate Who Matches You

Find hiking friends who match your skill level, location, and age group, and hike with someone you can trust based on their manner score.

CORE VALUE

A Service Built for Hiking Beginners

Check the trail on the map so you never get lost, and use level-based reviews to find a mountain that fits your fitness.

Personas

PERSONA 01

Lee Yujin (22) · Beginner Hiker

A beginner hiker always on the lookout for a good Instagram shot. She needs beginner-friendly features, and since she enjoys socializing on social media, she treats hiking as a way to make friends too.

Pain point: Preparing for a hike, finding the trail on the way up and down, and getting home

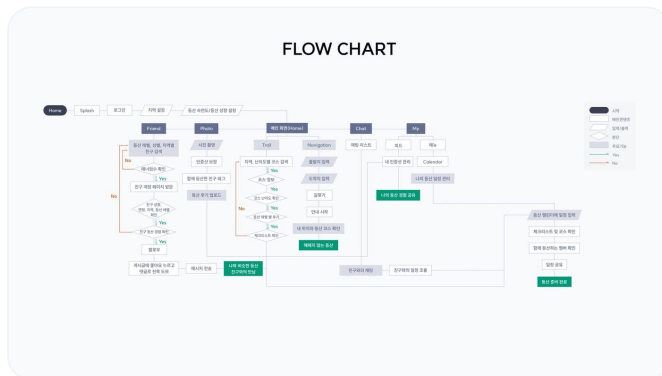

PERSONA 02

Kim Younghyun (32) · Fitness-Matched Exercise

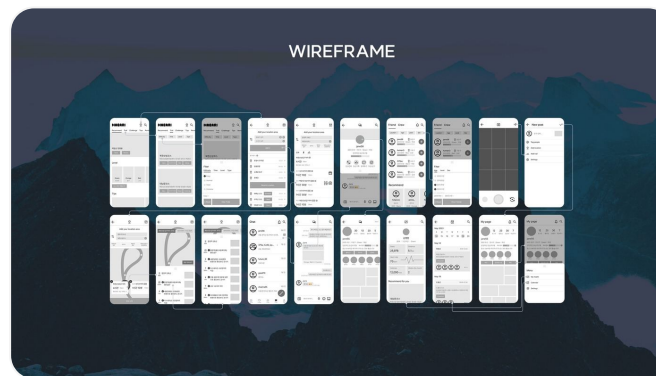

He wants to hike for enjoyable exercise and a healthy body. Knowing his stamina is limited, he needs courses matched to how much exertion he can handle.

Pain point: Giving up midway during a hike, and the descent

Usability Testing

Round 1 UT

In the first round of usability testing, the success rate was low for Mission 1 (finding a friend and checking their profile). The cause was unfamiliar wording — users were more familiar with “Course” than “Trail,” and wanted detailed labels like

Beginner/Intermediate next to the level. Mission 2 (finding a course and adding it to the calendar) was completed successfully by everyone.

⚠ **The manner score was hard to understand**

→ **Redesigned the manner-score UI and added an explanatory caption**

⚠ **Wording users don't commonly use**

→ **Switched to more familiar wording and added level-name captions**

⚠ **Unclear whether "Challenge" meant a challenge or a photo story**

→ **Changed the challenge into a badge-illustration graphic**

⚠ **A non-interactive checkbox on the course detail page that users kept tapping**

→ **Kept the checkbox only in the calendar and removed it from the course detail page**

Round 2 UT

In the second round, every user succeeded at every mission, including Mission 1 — resolved within a minute by all participants this time. We did learn that users struggled where status values weren't clearly labeled, and revised the UI accordingly.

⚠ **Current location wasn't visible in the Friends menu**

→ **Added a current-location button and a bottom-sheet control for selecting an area range**

⚠ **The calendar icon was hard to recognize**

→ **Changed it to an icon that reads more clearly as a calendar**

⚠ **No indication of which filters were applied on the friend search results screen**

→ **Displayed the applied filter values on the friend search page**

⚠ **"Add members" in the calendar didn't read as a button**

→ **Added an arrow to make it clearly a button**

MAIN PAGE

Hiking Info for Beginners

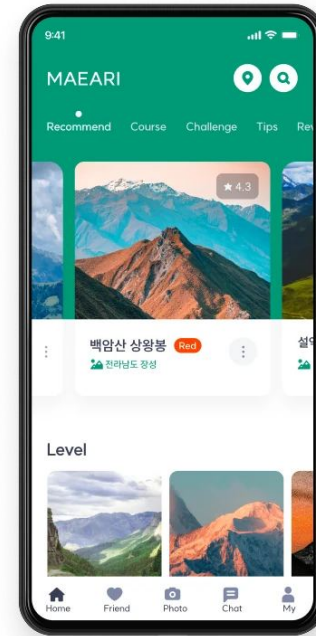

The main page provides guides and navigation for beginner hikers, along with course recommendations tailored to their level. The menu was designed as a bottom tab so users can check it easily on the trail.

Green · Beginner

Orange · Intermediate

Red · Advanced

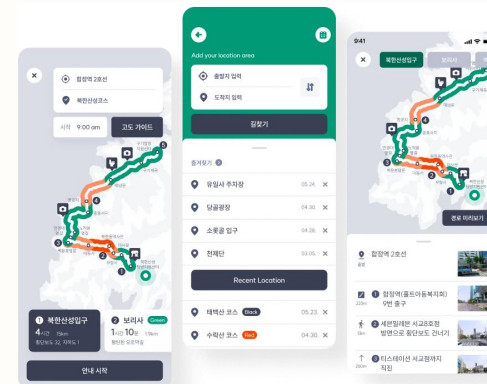

Black · Expert

NAVIGATION

Course Info With GPS

You can check your current location and the direction you need to go on the map, and see previously searched courses at a glance.

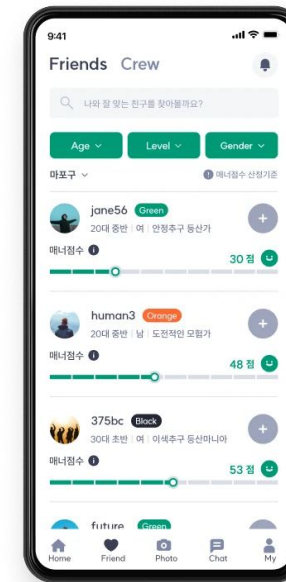

FRIEND

Make Friends like Me

By categorizing location, age, hiking level, and gender, you can meet hiking friends who match you well.

- Find friends similar to you through categories.
- Enter your location and set a range to search for friends within that area.
- The manner-score system provides an indicator to check the other person before meeting offline.

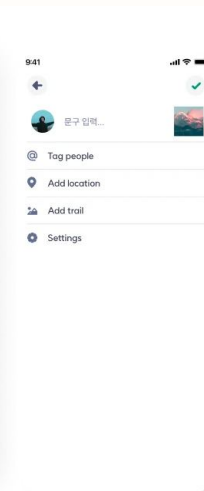

PHOTO

Take Pictures of Beautiful Places

You can take and upload hiking verification photos with beautiful mountain scenery as the background.

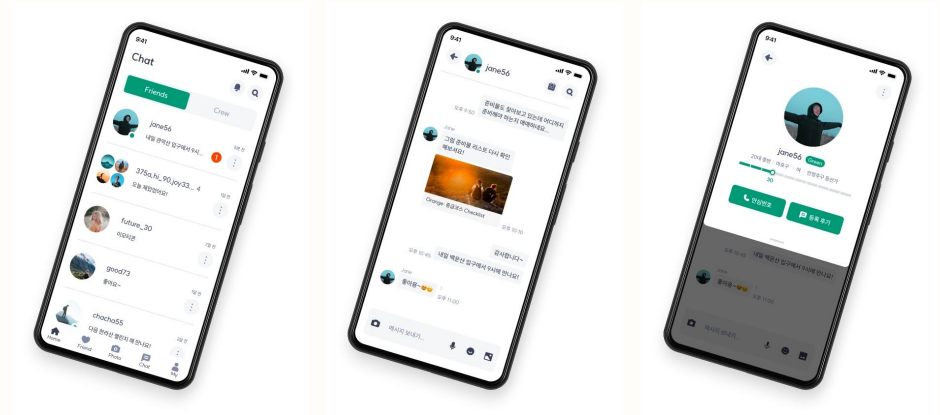

- Users can also upload photos they've already taken.
- You can upload multiple images. When uploading several, only the first photo appears in the preview.

CHAT

Chat with Friends

You can chat with hiking companions and friends you've already gotten close to.

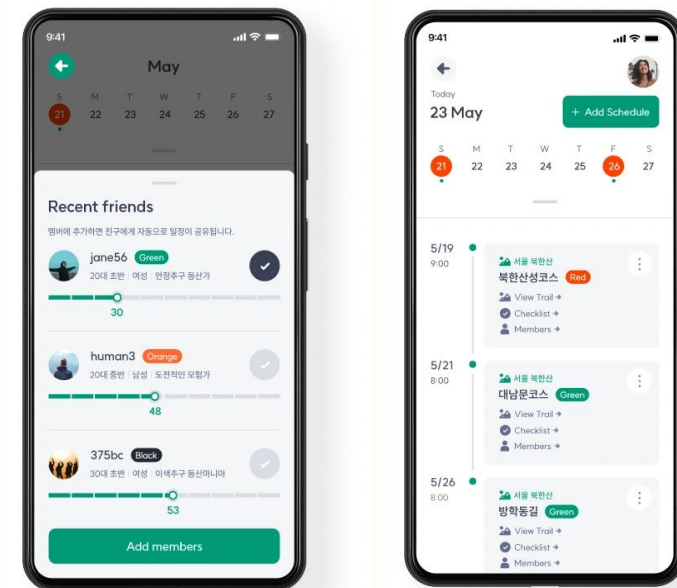

MY PAGE · CALENDAR

Manage My Schedule

You can manage and record your hiking schedule and share it with friends.

- Adding someone as a member in the calendar automatically shares the schedule with them.
- As a registered schedule date approaches, a notification with a packing checklist for the course is sent to the user one day in advance.

Reflection

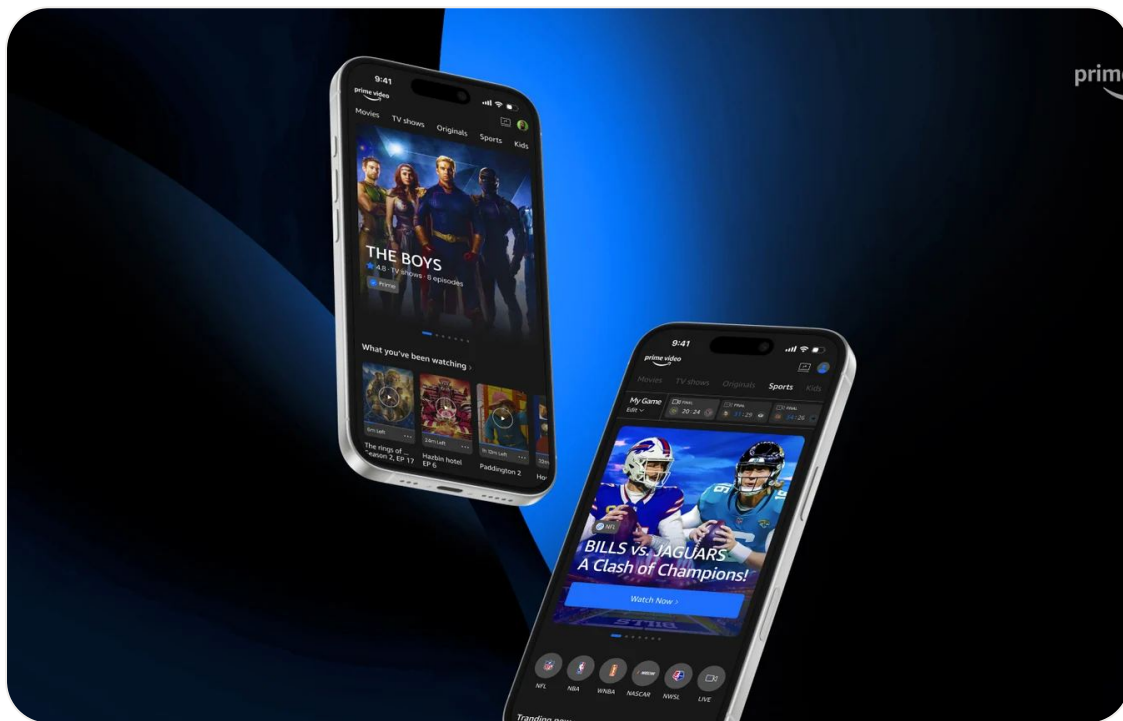

Planning a hiking community app for users in their 20s–30s was my first time designing a new service from scratch. Early on, I expanded features using a mind map based on frustrations I'd personally experienced, forming the hypothesis that this would be “a service for sharing the hiking experience with others.” After running user interviews, I found an important difference: relationships mostly stayed one-off, and users valued “the personal hiking experience itself” more than ongoing communication. Based on that insight, I redefined the service around recording one's own hiking experience, supporting beginners, and connecting people only when needed.

The first interviews and usability tests I ever ran felt unfamiliar, but watching the service direction take shape as I observed real user reactions left a strong impression on me. That experience made me far more interested in the “planning stage,” and I went on to choose planning as my career, working as a planner for 2 years and 4 months. Looking back, this project's experience was the pivotal starting point that shaped my career path.

Background & User Survey

Streamflation

As subscription prices kept rising, users became more selective about which services to keep.

Subscription Fatigue

Subscribing to multiple OTT services at once made the fatigue of choosing what to watch worse.

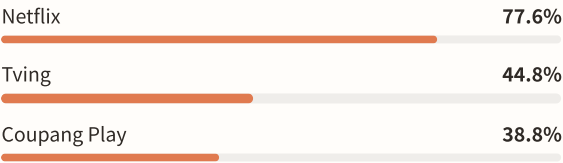

Content Variety

Our survey found that content variety and ease of continuing to watch were the key criteria for choosing a service.

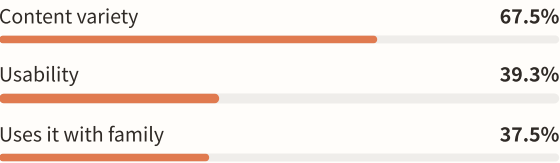

User Survey

Survey of 67 people who had used an OTT service at least once — many cited “content variety” as the main reason they kept using OTT.

CURRENTLY-USED OTT RANKING

REASONS TO KEEP USING

REASONS TO STOP USING

Competitor Analysis

Netflix's strength lies in an immersive experience centered on original content, while Prime Video's strength is the broad user base secured through bundling.

Netflix

#1 global OTT platform
Vast content library
Strong at producing original content
With ads \$7.99 · Standard \$17.99

Prime Video

Secured NBA rights, won core sports fans
Secured a broad user base through bundling
AI recommendations and audiobook acquisition
With ads \$8.99 · Ad-free \$11.98

Solution

Reinforce Strengths

Maximized content value with an intuitive interface so high-quality content is easier to enjoy

Address Weaknesses

Raised user satisfaction enough that mandatory ads feel acceptable

Strengthen Market Competitiveness

Delivered a personalized experience that satisfies everyone even when several people share one bundled Prime membership

Key Features

01

Content at a Glance

Let users see content across movies, TV shows, sports, and more at a glance, and jump straight into whatever they want.

02

Continue Watching at the Top

Placed paused content at the top so users can resume it instantly, improving accessibility.

03

A Special Feature for Sports Fans

Pinning a game of interest in the Sports section surfaces it in My Game, so users never miss a live score.

04

Easily Search for the Content You Want

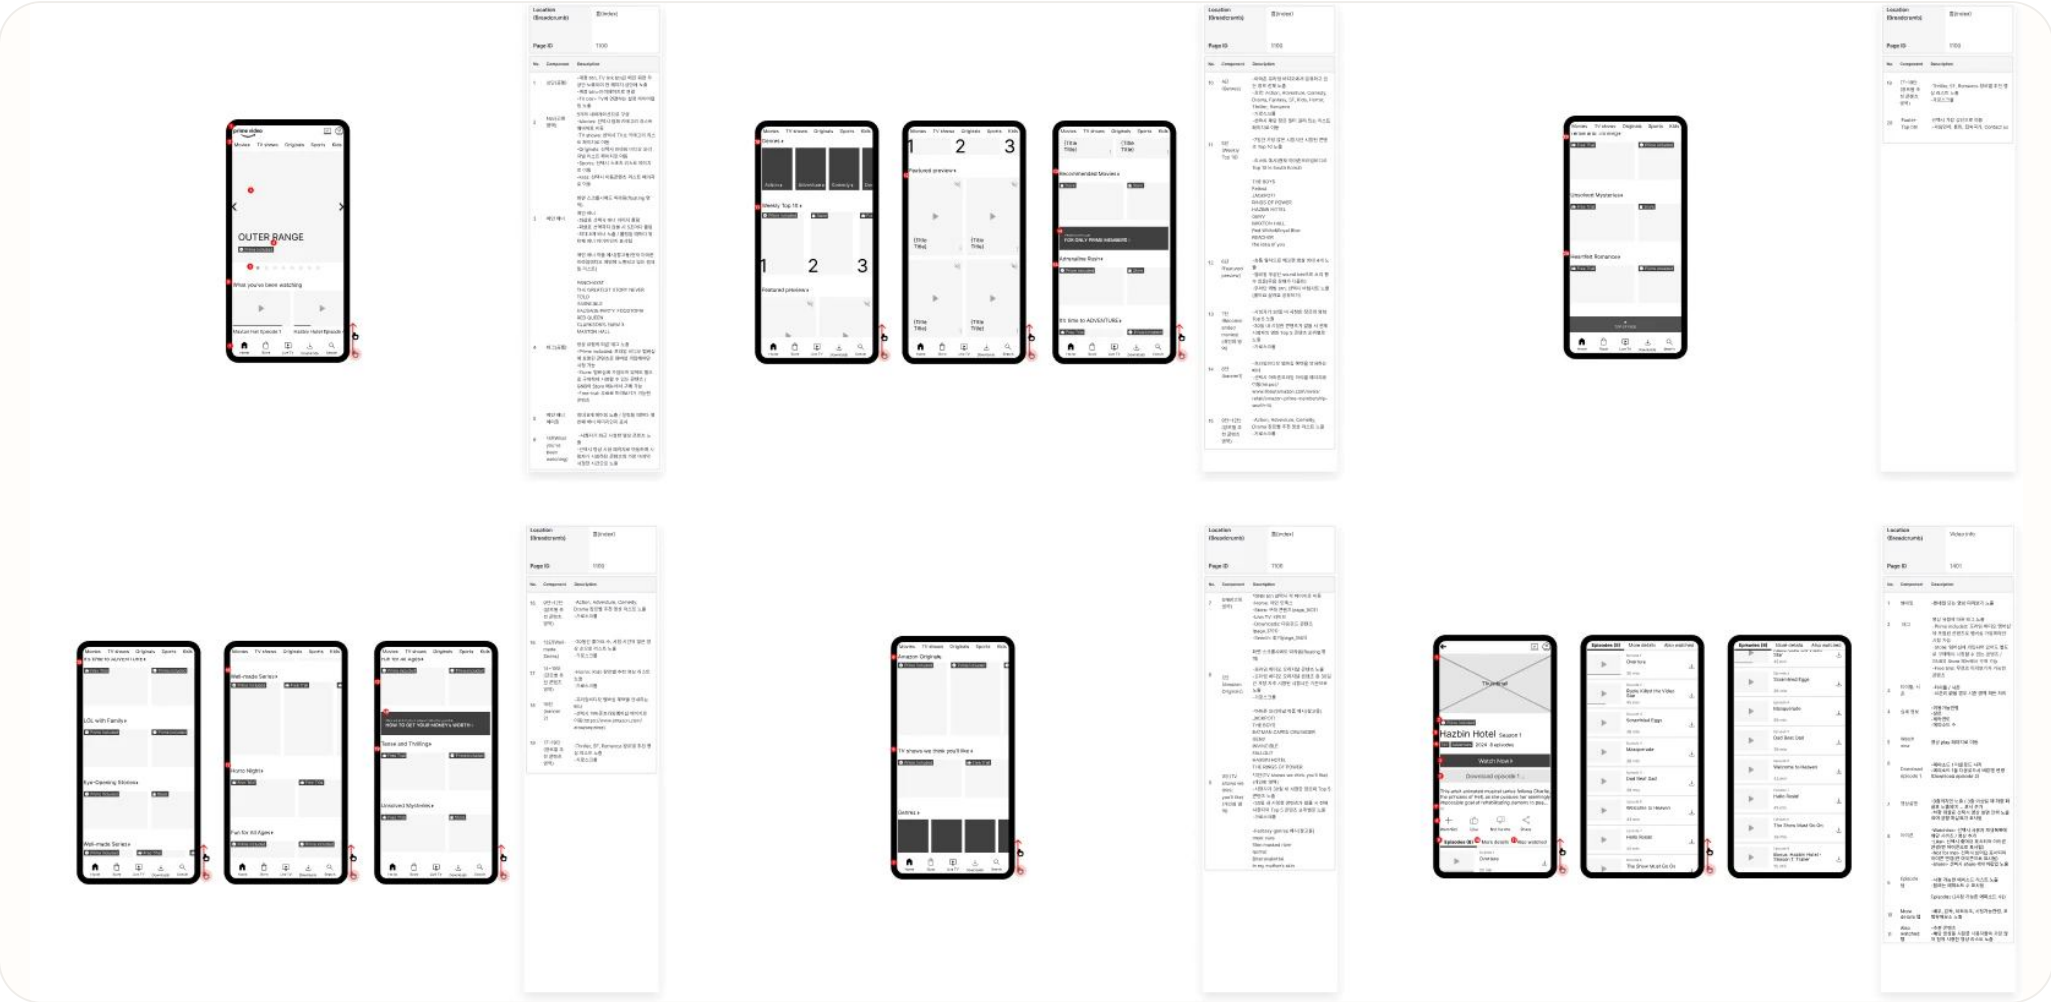

Enabled simple keyword search and filters so users can narrow countless results down to what they actually want.

05

Watch Instantly, Anytime, Anywhere

Streamlined the download flow so users can watch smoothly regardless of their internet connection.

Story Board

Usability Testing

- ⚠ Hard to find the favoriting feature in the Sports tab

→ Revised the UI at the top of the Sports tab
- ⚠ The toggle didn't look expandable, which caused confusion

→ Redesigned the toggle icon
- ⚠ Too many tags made information hard to scan

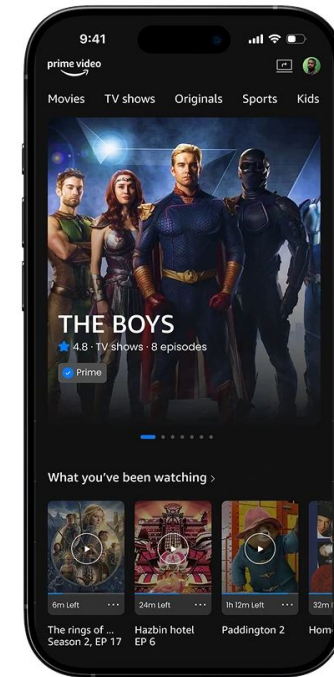

→ Shortened tag titles and emphasized the Prime tag icon

00 • HOME

Onboarding

Meet the improved Amazon Prime Video, right now.

- Did you leave something unfinished? We placed it near the top so you can jump right back in.
- Find Originals available only on Prime Video, all gathered in one place.
- Easily pick the genre you want from text-style buttons that fit within a single scroll.
- Not sure if this content fits your taste? Try it out first in short-form.

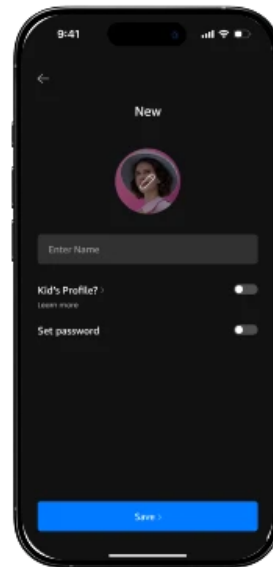

Build a Profile That's Safe and Fun

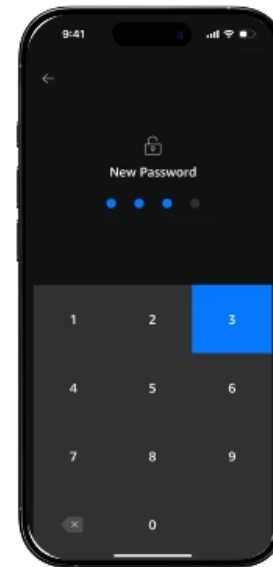

After logging in, easily create your own profile. Kids Profiles filter out violent content so children can watch safely.

01 Tap New to create a profile. The shared account owner has a star mark by their name.

02 Set a name, photo, profile type, and password.

03 Set a password so shared users can't access your profile or watch history.

04 Your profile is created! Ready to enjoy Amazon Prime Video?

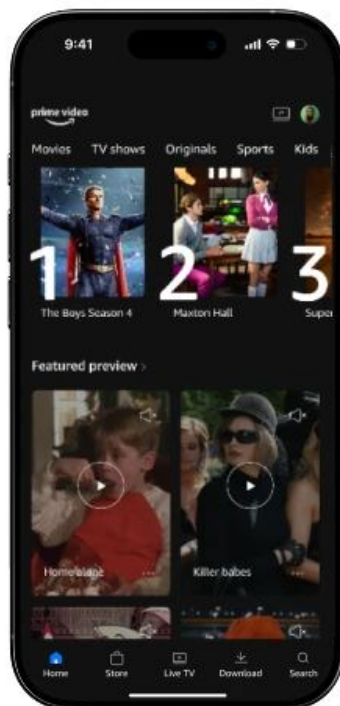

Content You Can Enjoy at a Glance

See interesting content across movies, TV shows, sports, and more at a glance, and jump straight into whatever you want to watch.

Home

- On Home, choose the type of content you want from the Movies, TV Shows, Originals, Sports, and Kids tabs.
- Already watching something? Pick up where you left off in What You've Been Watching.

- Recommended content is surfaced by genre so you can easily find something that fits your taste.
- Want a quick trailer? Check out short-form previews in Featured Preview.

Movie

- In the mood for a movie today? Head to the Movies page to start watching.
- Choose the genre you're after — Action, Romance, Horror, and more.

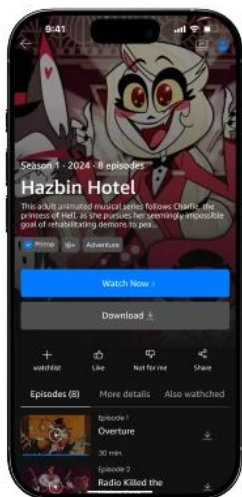

Sports

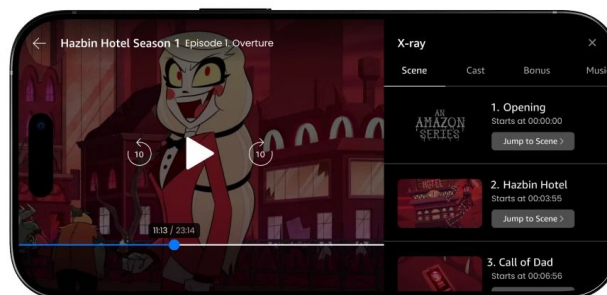

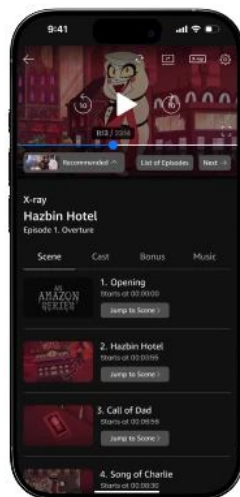

- On the Sports page made for sports fans, check scores and highlight clips for football, basketball, racing, and more.

Watch Instantly, Anytime, Anywhere

Enjoy the content you want to watch right away. If you'd like smooth playback regardless of your internet connection, downloading it ahead of time is a great option.

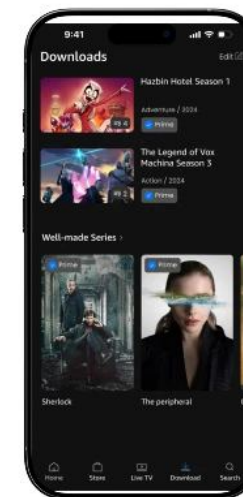

Check details on the content page, then tap Watch Now to start watching.

Use X-Ray to instantly look up music, cast, and background info for each scene — a Prime Video original feature.

Download content so you can watch it offline. Find downloads in the Downloads tab.

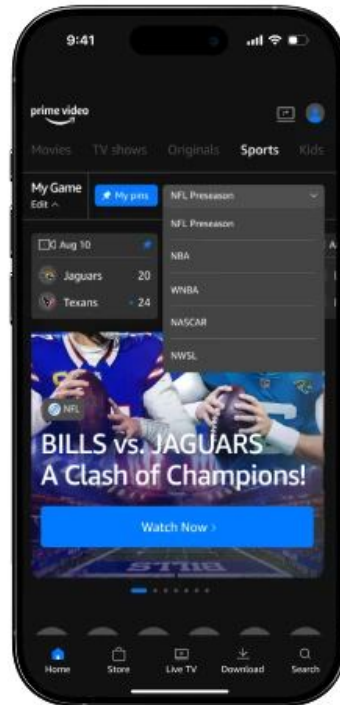

A Special Feature for Sports Fans

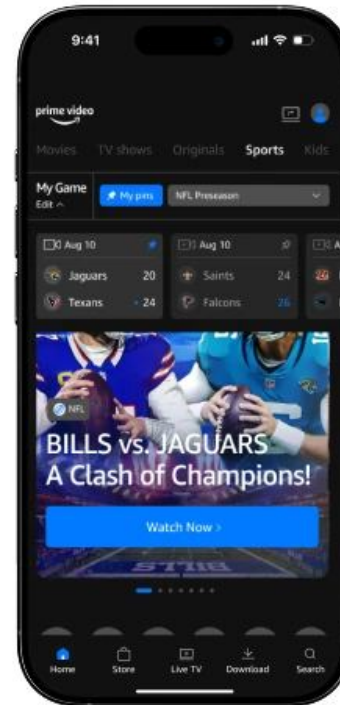

Pin the games you're interested in from the Sports section so you never miss a favorite match. With My Game, you can follow live scores without missing a beat!

01 A new My Game area appears at the top of the Sports page, showing live scores.

02 Tap Edit to see games you can favorite, then tap the pin button to add them.

03 Check the games you've already pinned in My Pins.

04 You can also pin a game from Today's Game — pin any match you don't want to miss today.

Reflection

Amazon Prime Video isn't an independent flagship service so much as a bundled benefit included with Amazon membership. Given that structure, a strategy centered on the primary service inevitably takes priority. Even so, since it holds the #2 spot in OTT market share and is used across many ages and countries, I concluded that helping a diverse user base consume content more conveniently was the better fit. Treating the broad user base secured through bundling as a strength, I improved the UX/UI around accessibility and ease of use, and validated it through three rounds of usability testing, confirming feedback that overall usability had improved.

Through this project I learned that even for a service that isn't the main flagship, setting a clear direction that fits its role and context is an important factor in improving user experience.

KEPCO Website Renewal

Redesigned KEPCO's information structure and visuals with the goal of restoring trust and disclosing information transparently.

CONTRIBUTION

Planning 100% · Design 100%

TEAM

4 people (planning shared /
design individual)

Problem & Solution

PROBLEM

Amid controversy over rate hikes and deficits that had eroded public trust, press releases and explanatory materials existed on the site, but the sheer volume made them hard to access.

Excessive content volume and an unclear target audience left the information hierarchy confusing, with the structure skewed toward investors.

Low-resolution images and icons, unresponsive hover buttons, and an excessive number of navigation items resulted in poor visual quality.

SOLUTION

Set the renewal direction around a KEPCO that rebuilds trust through transparent disclosure (AS-IS: lost trust → TO-BE: restored trust and transparent information).

Grouped similar items from the crowded, complex navigation into 5 top-level categories, restructuring the information hierarchy.

Visualized the direction of restored trust and transparent disclosure through a main visual built on a light-bulb graphic motif and glassmorphism.

Design Decisions

01

Navigation Restructuring

Grouped similar items from the crowded, complex existing navigation into 5 categories: Company, Disclosure, Business, Customer Center, and PR Center.

02

Glassmorphic Main Visual

Created a bright, glowing light-bulb image to represent a power company, and applied glassmorphism to the top and bottom of the screen in line with the transparent-disclosure direction.

03

Nationwide Power Data on a Map

Displayed real-time power supply status and nationwide branch offices on a map for at-a-glance viewing, applying the same glassmorphism to the map and info boxes for visual consistency with the main visual.

Disclosure to Rebuild Trust

Placed management status for investors and a news/press-release section to communicate issues transparently rather than hiding them, and broadened communication touchpoints with brightness-consistent news images and social links.

Reflection

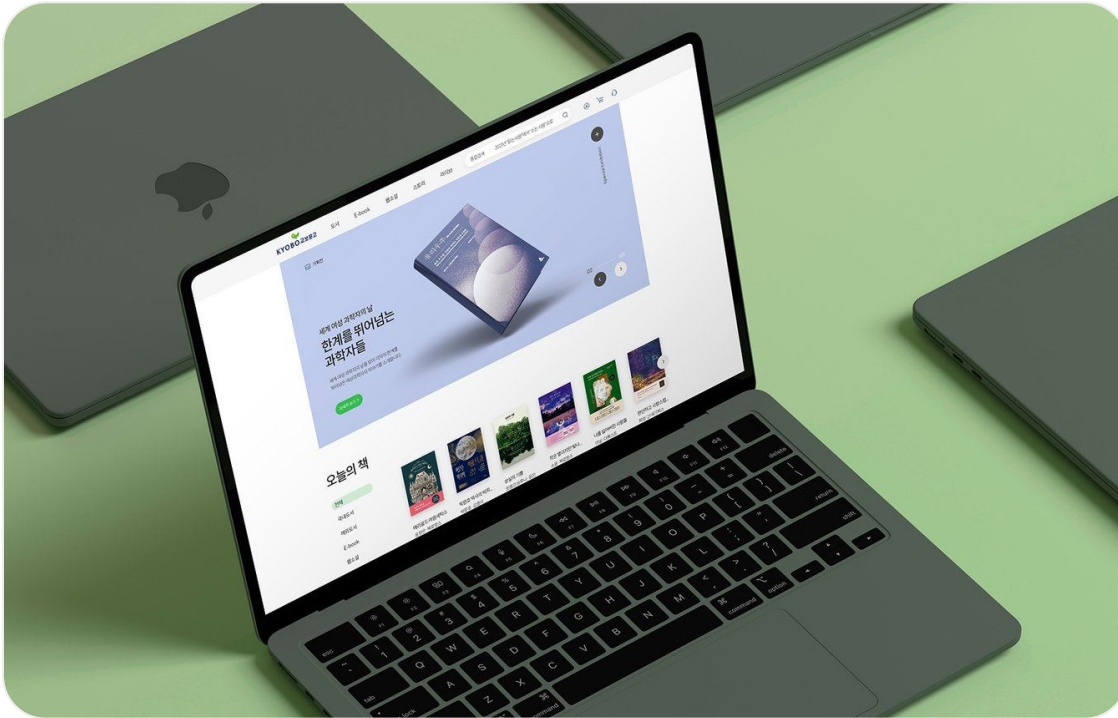

The biggest challenge during planning was the range of controversies surrounding KEPCO. Rate hikes, deficit concerns, and political issues were all tangled together, and I had to think carefully about what message to convey. Early on, I considered minimizing the negative issues and leading with a mostly positive image, but I realized that downplaying problems users already felt firsthand could undermine trust further.

Since rising electricity rates are an issue every citizen experiences directly, I decided transparency mattered more than concealment, so I set “trust” as the renewal's core direction and redefined the plan around a structure that communicates the key issues clearly.

Kyobo Books Website Renewal

Redesigned Kyobo Book Centre's main page so its wide range of digital content is easy to discover, after Korea's adult reading rate declined and browsing habits shifted toward video.

ROLE

UX Research · Website Analysis ·
UI Design

PERIOD

2023.03 – 04

TOOLS

Photoshop · Illustrator · VS Code

TYPE

Website Renewal

CONTRIBUTION

Planning 100% · Design 100%

TEAM

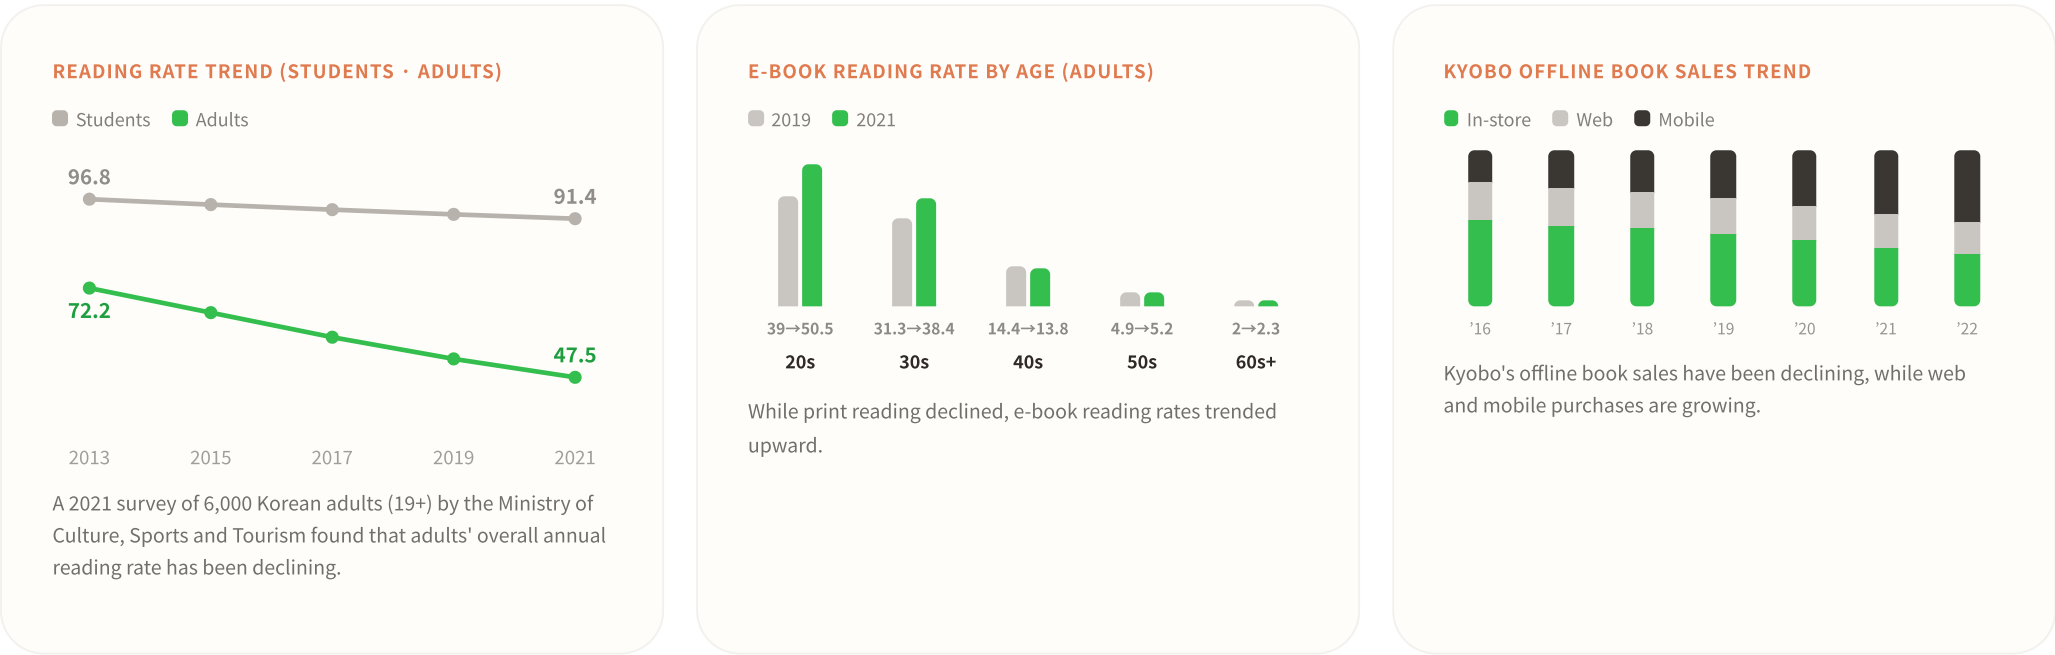

1 person (solo project)

Overview

Korea's adult reading rate is declining, and people in their 20s–30s are filling their leisure time with video content instead of books. Kyobo Book Centre has also identified digital transformation as a core challenge and now holds a large amount of digital content such as audiobooks and e-books — but the website's confusing wording and complex information

structure make that content hard to access. This is a website renewal project that reorganizes Kyobo's diverse digital content so it's easy to discover from the main page.

Desk Research

Korean adults' reading rate is falling, but e-book reading is rising — and Kyobo's offline sales are declining while web and mobile purchases grow.

SWOT Analysis

- Offline book sales declining
- ₩4.5B deficit (2020)
- Operates with Kyobo Life Insurance's support

Strength

Korea's largest bookstore by scale
High brand awareness

Weakness

Operating at a deficit
Not a highly profitable business

Responsive to social trends
Smart logistics system
Digital transformation underway

Opportunity

Strong social influence
Selected as a future heritage brand
Rising popularity of e-books

Threat

Rising shipping costs
Decline of the publishing industry
Shrinking reading population

Kyobo has strong brand awareness but is seen as a low-profit business. Combined with COVID-19, declining offline sales led to a ¥4.5B deficit in 2020, and the company now operates with support from Kyobo Life Insurance.

Website Analysis

01

Hard-to-understand wording

02

Complex navigation

03

Pop-ups that fill the screen

04

Content built around print books

Kyobo's existing website was built around print books, and confusing labels (like Toksoda, sam) for the e-book, web novel, and subscription services central to its digital shift were buried in the navigation.

Interview

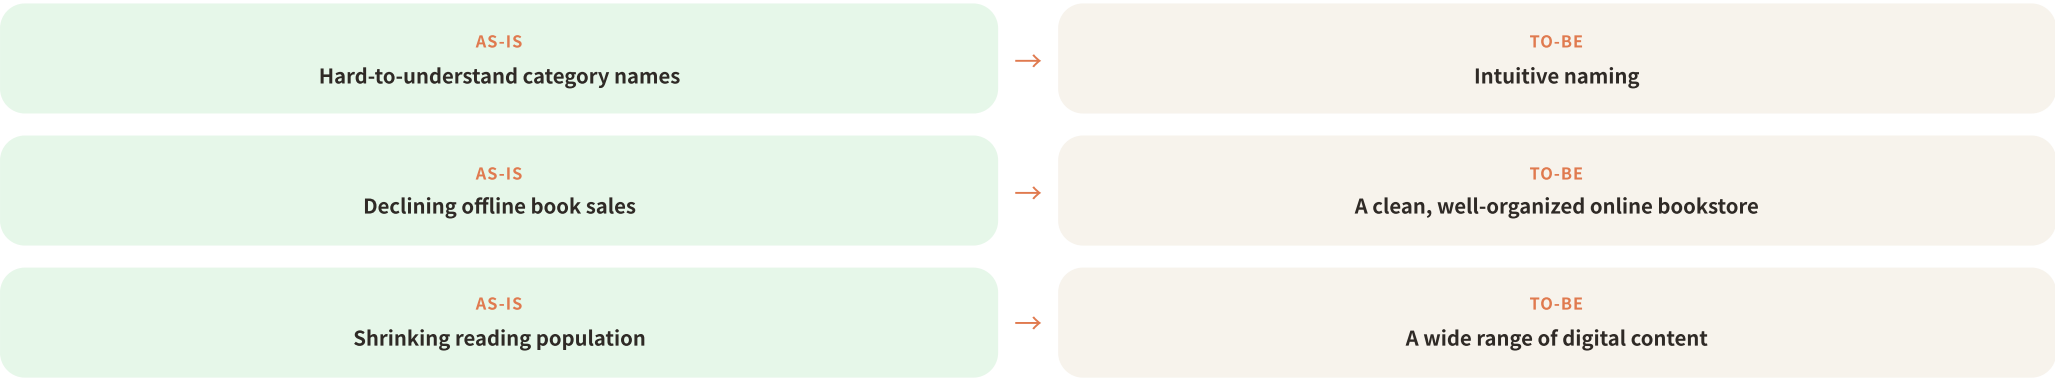

I interviewed four people in their 20s and 30s who have used Kyobo Book Centre.

Most watched YouTube during their leisure time.

They found Kyobo's site wording unintuitive and confusing.

They wanted Kyobo's information hierarchy and wording improved.

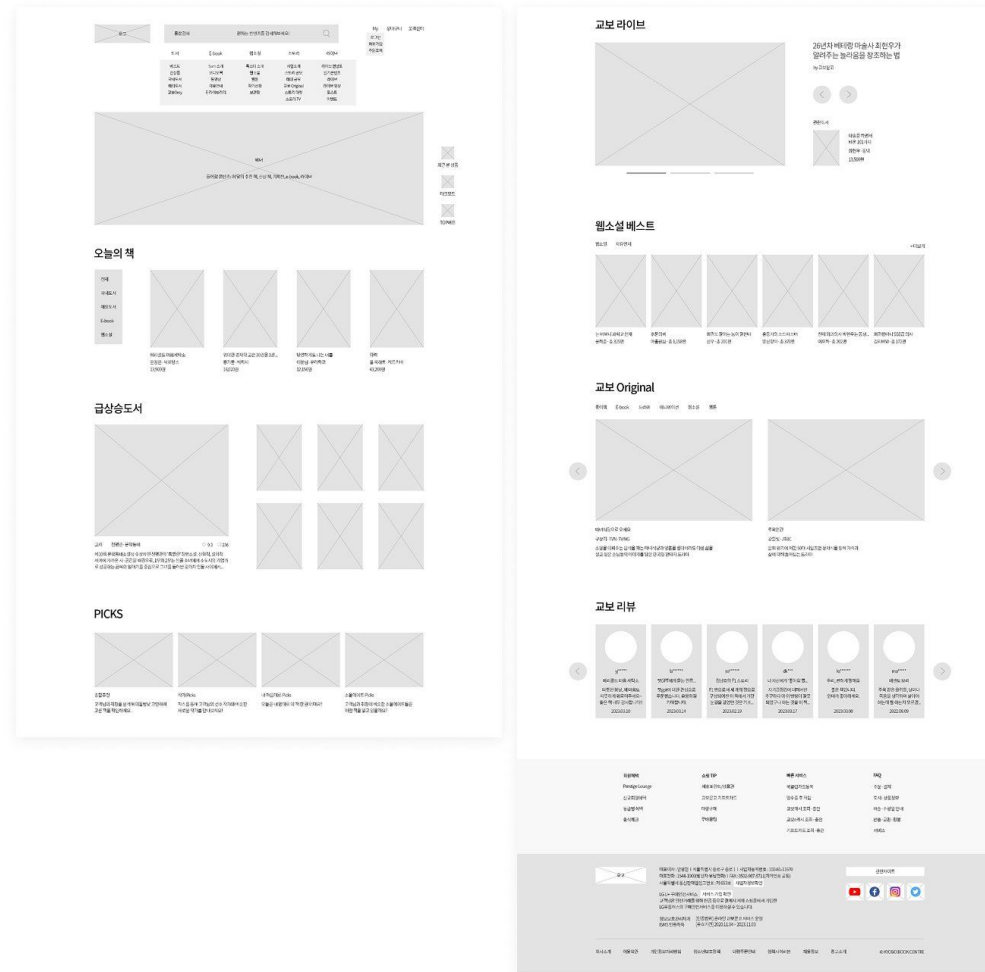

AS-IS → TO-BE

Project Goal

A Kyobo Book Centre website that offers people in their 20s–30s who want to explore diverse digital content a clean, well-organized navigation and

Wireframe

Concept

Various

Showcased Kyobo's diverse content — web novels, e-books, Kyobo Live, and more.

Organized

Neatly organized a large volume of complex content.

Friendly

Expressed the friendliness of a bookstore that has stood the test of time.

Style Guide

COLOR

Since thumbnail colors vary widely across content, I used white as the base so content stays front and center, with gray as a supporting tone and Kyobo's core green as the accent.

#D2E2D7

#D6F2DB

#34BE4E

#F5F5F5

#818181

TYPOGRAPHY

Used the highly legible 본고딕 for body text, paired with Poppins and Pretendard for numerals and Latin text.

본고딕 KR KOR

Poppins ENG

Pretendard ENG

BUTTON

Used Kyobo's core green with rounded pill buttons to express Kyobo's friendliness.

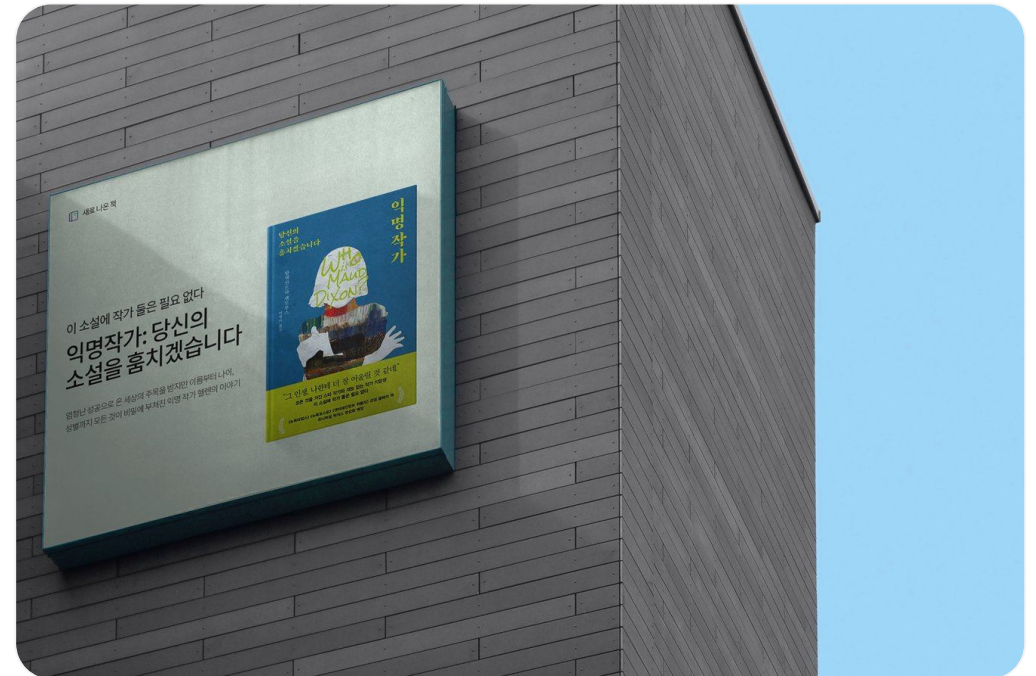

ICONOGRAPHY

Used Kyobo's navy and green in a clean, friendly, rounded line-icon style.

Banner Design

Renewal Design

SEARCH BOX

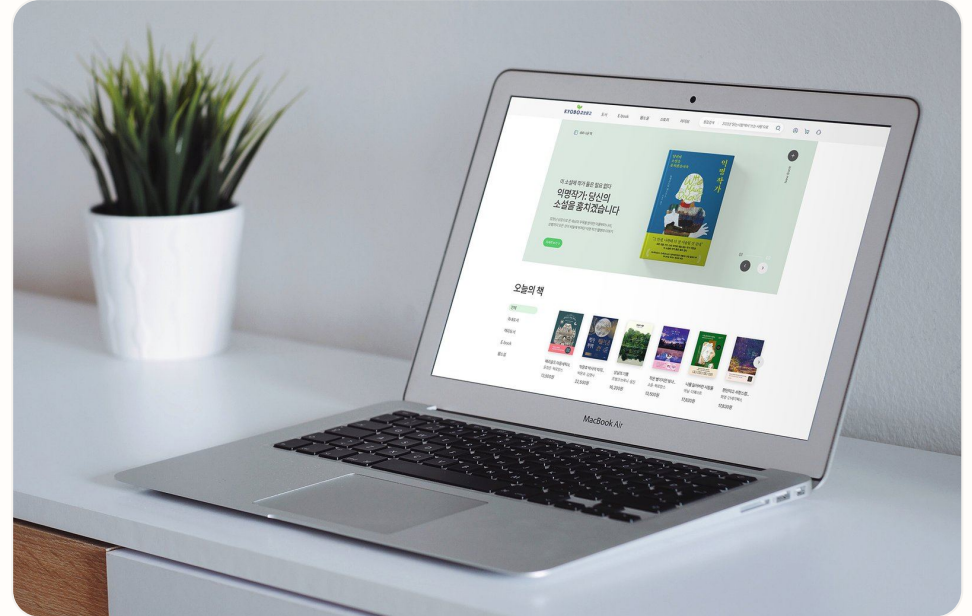

Because the site holds such a large amount of content, I moved the search bar into the navigation so users can search the moment they land on the site.

WRITING

I renamed confusing service names like Toksoda, sam, and Story into more intuitive labels, and added a menu that introduces what each one means.

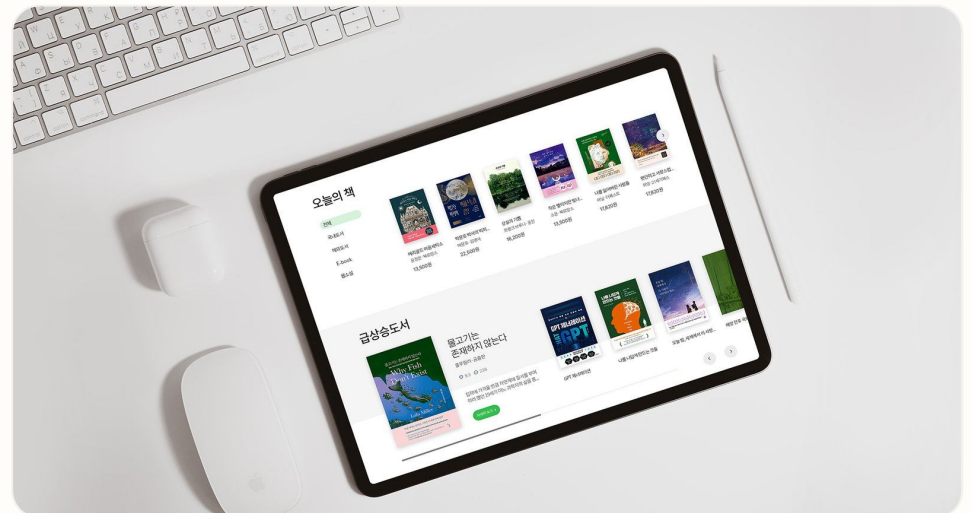

BANNER DESIGN

I designed a rolling banner that introduces books.

BOOKS

Showing Kyobo's wide range of content matters, but since this is fundamentally a bookstore site, I placed book content near the top.

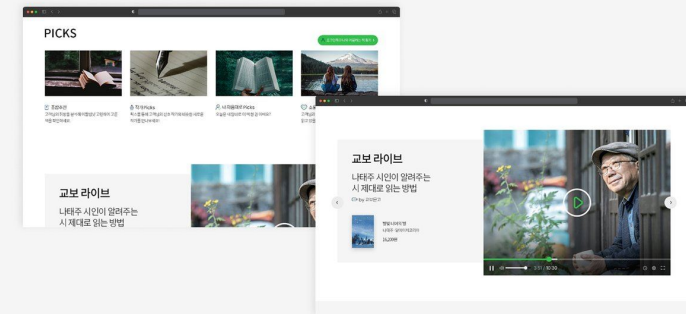

PICKS

I placed PICKS, a personalized book recommendation service, in the third row to show that Kyobo offers the kind of personalization video platforms are known for, strengthening its competitiveness.

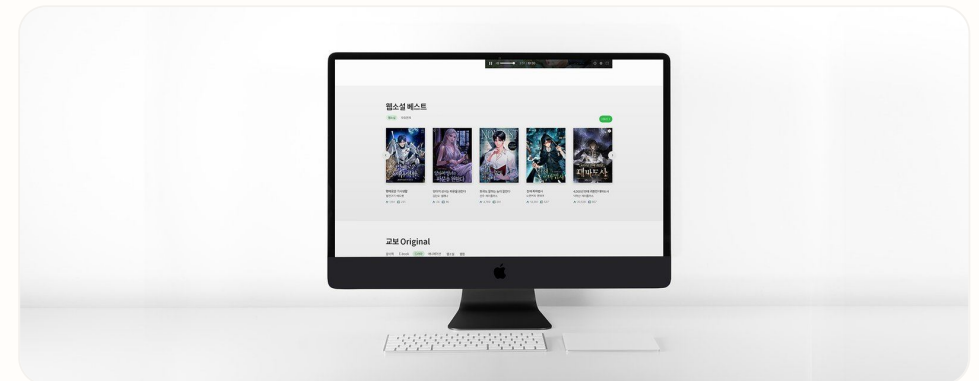

KYOBO LIVE

I highlighted Kyobo Live to emphasize its role as a cultural hub, and surfaced related books alongside it so viewers could go on to purchase them.

WEB NOVELS

Korea's web novel market has been steadily growing, and it grew even faster after COVID-19. To show that Kyobo also carries plenty of great web novels, I placed a web novel section in the fifth row.

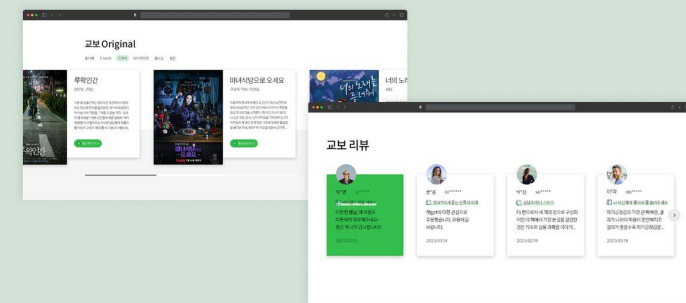

STORY

Kyobo produces original content through a submission platform called Story, and some winning entries have already been adapted into dramas. I placed this in the sixth row to showcase the range of content Kyobo offers.

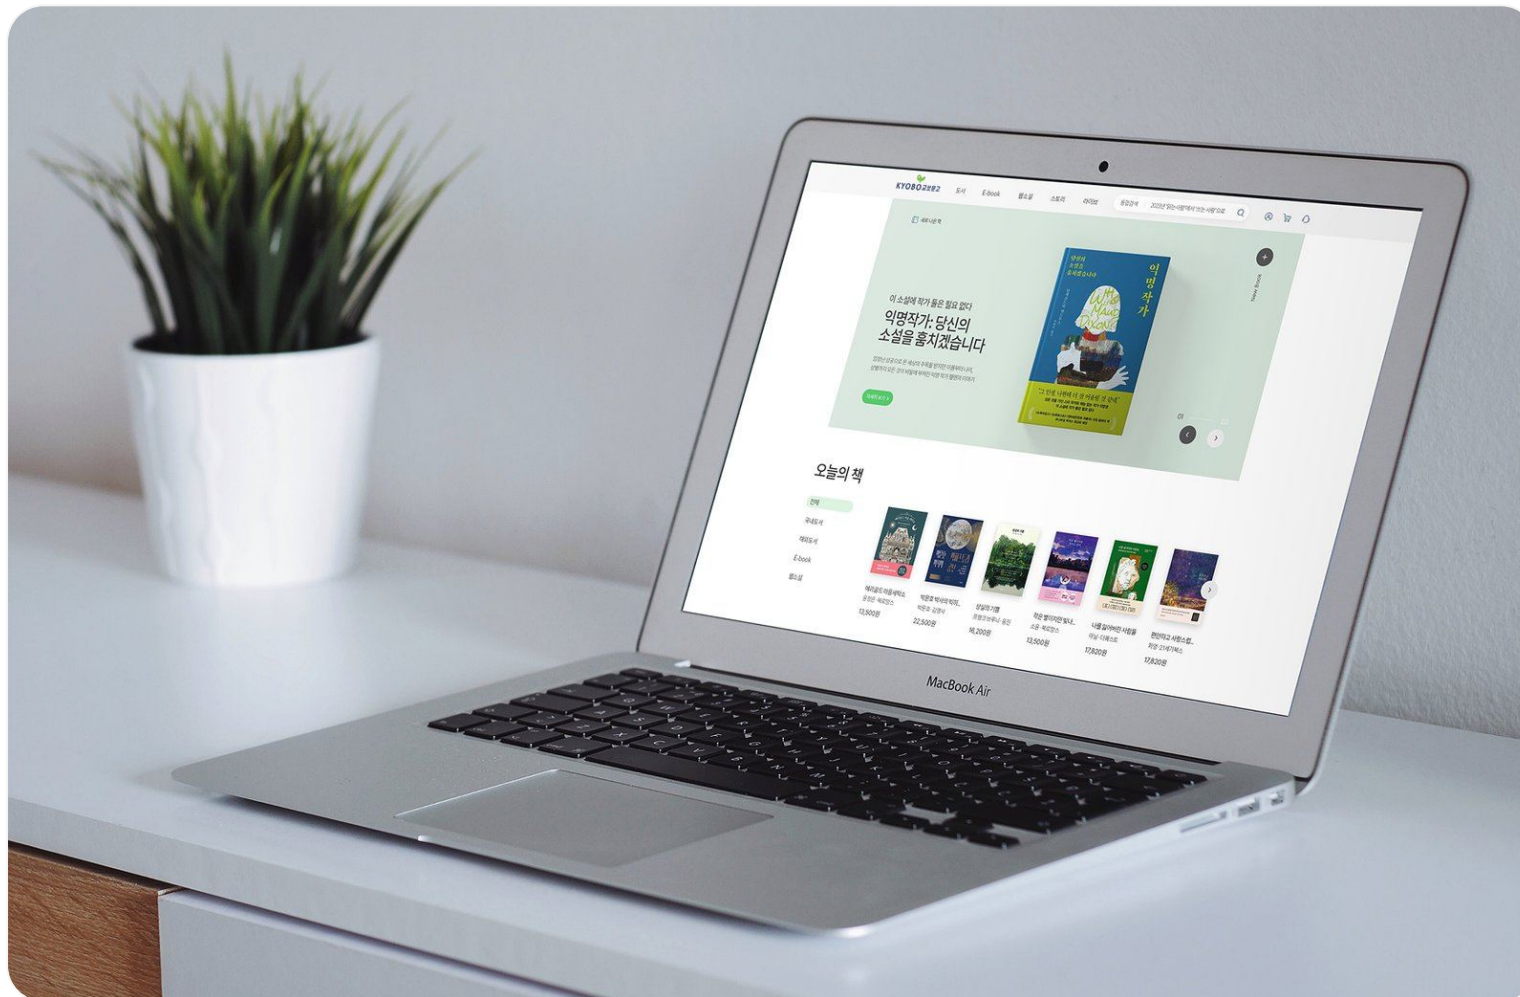

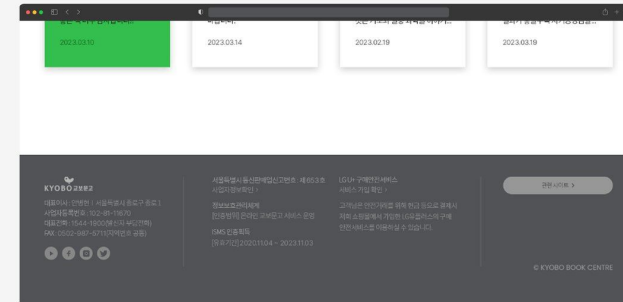

REVIEW

I surfaced book reviews in the seventh row so people can see what others are reading, share opinions on books, and get help deciding what to buy.

FOOTER

Since this is a book shopping site, I placed the essential elements it needs along with Kyobo's social channels and related sites in the footer to improve usability.

Reflection

In this project, I completed both the design and the publishing, then discovered a problem during the refinement stage that sent me back to the planning phase. Early on, following the same approach I'd used on other projects, I emphasized brand identity with a bold design that stretched the main visual wide across both sides of the screen. But when I applied the same approach to Kyobo, the core content — books — didn't get enough visibility.

To find the root cause, I re-analyzed other bookstore sites and found that most of them used narrow, information-focused banners instead of bold visuals. This led me to redefine the core of the Kyobo site: not 'expressing the brand' but 'delivering book content.' I then reworked the planning and design from the ground up around a structure that lets the content stand out.

This experience taught me that even a highly polished design can get in the way if it doesn't fit the service's purpose, and that delivering core content effectively requires designing the right structure from the earliest planning stage.

[View Full Case Study on Behance ↗](#)
